HEDIS 2014 Final NDC Lists

Notes:

- Several NDC lists and medication tables are used for multiple products. The NDC lists reference the table names used in the Volume 2 Technical Specifications for Health Plans and the Technical Specifications for Physician Measurement. When a list/table applies to additional products, it is noted below.
- Changes that have been made to the medication tables are summarized in the HEDIS 2014 NDC List Technical Update.
- Other NDC codes that match generic name, strength/dose and route indicated in the posted NDC lists may be mapped for use in HEDIS reporting. Please refer to the general guidelines for Mapping Proprietary or Other Codes section for additional information.
